

Wooden Counting Blocks Teacher Guide

This user guide takes you through a variety of activities that can be used for your Wooden Counting Blocks set

Activity 1: Count in Numbers up to 5

educational advantage

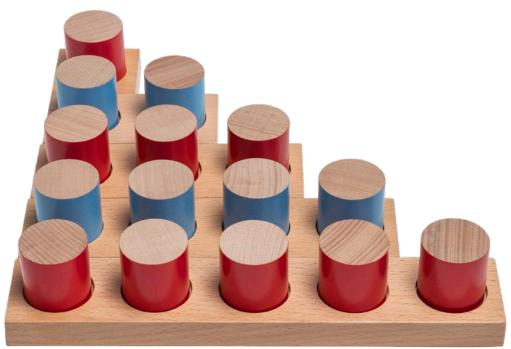

Use the bases 1-5 to count up to 5.

Children can add the counters 1 by 1 to the bases as they count. Laying the bases side by side also demonstrates 1 more and 1 less.

Bases before counting:

Bases with counters after counting:

Activity 2: Count up to number 10

Use the bases to count up to number 10 either as a number line with 2 x number 5 base pieces:

...or as a 10 frame pattern:

Activity 3: Addition to 20

educational advantage

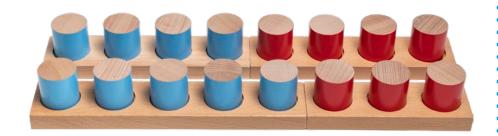

Use the bases for simple addition.

Example 1:

4 + 4 = ?

$$4 + 4 = 8$$

Example 2:

5 + 3 + 2 + 1 = ?

$$5 + 3 + 2 + 1 = 11$$

Example 3:

$$7 + ? = 9$$

$$7 + 2 = 9$$

Activity 4: Subtraction 0-20

educational advantage

Use the bases for simple subtraction.

Example 1:

5 – 1 = ?

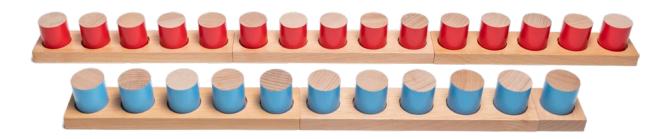

5 - 1 = 4

Example 2:

15 – 11 = ?

15 - 11 = 4

Example 3:

$$8 - 3 = 5$$

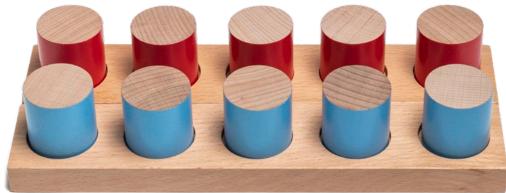

Activity 5: Use as a ten frame

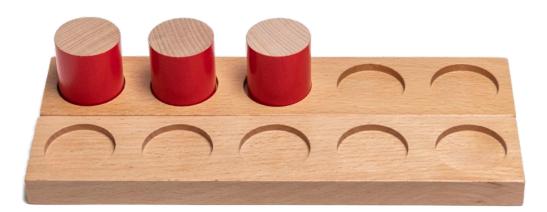

Place 2 of the number 5 base pieces horizontally to create a ten frame and use for all your 10 frame activities:

Show numbers up to 10:

Demonstrate how 2 numbers add up to 10:

Add 2 banks of counters to show that each row

Activity 6: Number Bonds

educational advantage

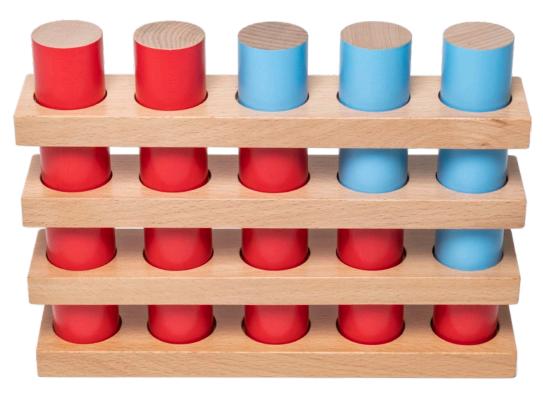

Start by choosing a number – in this example, number 5 base is chosen:

Build upwards to show the different number bonds to 5:

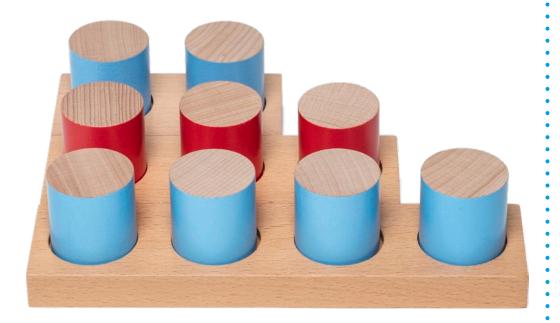

Activity 7: One More and One Less

educational advantage

There are 2 ways you can show one more and one less with our counting blocks:

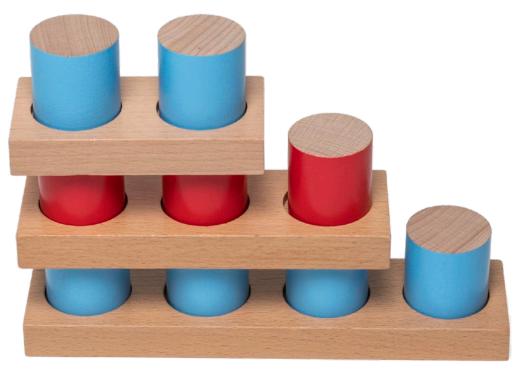

Method 1

Show the bases and counters in horizontal rows:

Method 2

Stack the bases and counters vertically:

Activity 8: Multiplication with small numbers

Use the bases to practise your first multiplication questions. This is designed for smaller numbers.

Example:

 $3 \times 3 = ?$

Start by getting 3 x number 3 base pieces and adding counters

Then line them up and use a number 5 base piece plus additional bases to more easily calculate the number it goes up to:

Answer: $3 \times 3 = 9$ (1 x number 5 base piece and 1 x number 4 base piece)
